COMMENTS

As Japan's incumbent domestic provider, Nippon Telegraph and Telephone Corporation (NTT) is the world's second largest telecom company by revenue. In 1999, NTT was divided into separate companies, which include domestic operators—NTT East and NTT West—and NTT Communications, the international service provider. The NTT Group also includes NTT DoCoMo, a mobile service provider.

In September 2000, NTT Communications acquired U.S.-based Verio, then among the world's largest web hosting companies. The two entities' backbones were merged to form a major global IP network.

NTT's combined IP services division currently offers colocation products, VoIP, web hosting and transit links up to 10 Gbps with a focus on the Asia-Pacific region. Recently, NTT has expanded its global presence in Europe and the U.S. through acquisitions of interests in systems integrator (SI). The NTT Communications Group now has more than 30 companies worldwide.
